

Date: _____

Unit #: _____

**PREPARATION INSTRUCTIONS FOR AN INTERIOR TREATMENT FOR
FRUIT FLIES AND OTHER SMALL FLIES**

Dear Resident,

A professional Pest Control Technician will be at our complex on _____ between
the hours of _____ AM/PM and _____ AM/PM.

**THE FOLLOWING PROCEDURES MUST BE COMPLIED WITH IN ORDER TO SERVICE YOU
OR YOU WILL FORFEIT THIS SERVICE AND BE CHARGED ACCORDINGLY.**

PREPARATION REQUIREMENTS:

We require you to be out of the apartment/unit for a minimum of 3 hours after a spray treatment in order to allow the treatment to dry. Pets i.e.: cats, dogs, and birds should be removed from the unit treated as well. Fish tanks should be covered and the pump turned off during the treatment. You are also required to complete the following preparations:

- Remove all foodstuffs and articles from the infested cupboards or drawers.
- Throw away all produce, especially fruits or vegetables not stored in the fridge. These items provide a food and breeding site for fruit flies.
- Place all infested food items in a plastic garbage bag and discard all infested products into outside trash bins immediately.
- Repackage all non-infested food items in airtight containers, i.e. glass jars, plastic Tupperware, etc
- Place non-infested foodstuffs and articles in the middle of the living room floor or on top of the dining room table and cover them with a blanket or sheet.
- When you return do not wash the shelves off. .

The chemicals are a direct contact material, which means that the pest has to make contact and then slowly dies. The material will be effective for 30-60 days, which will also affect further re-occurrence.

Please notify the manager if you are unable to meet these specific requirements at least one day prior to your appointment. If you have any questions, please contact your community manager.

THANK YOU FOR YOUR COOPERATION

State law requires that you be given the following information:

CAUTION: PESTICIDES ARE TOXIC CHEMICALS. Structural Pest Control operations are licensed and regulated by the Structural Pest Control Board and apply to pesticides which are registered and approved for by use by the California Department of Food and Agriculture and the U.S. Environmental Protection Agency. Registration is granted when the state finds that, based on existing scientific evidence, there are no appreciable risks if proper use conditions are followed or that the risks are outweighed by the benefits. The degree of risk depends upon the degree of exposure, so exposure should be minimized.

ANTICOAGULANT REACTION:

If Rodenticide ingestion occurs, you may experience symptoms of mild shock or bleeding.

PESTICIDE REACTION:

If within 24 hours following application you experience symptoms similar to common seasonal illnesses comparable to the flu, contact your physician or poison control center and your pest control operator immediately.

CHEMICAL INFORMATION

- 565 PLUS XLO - Pyrethrins/Allethrin/Piperonyl Butoxide
- ALPINE WSG INSECTICIDE - Dinotefuran
- CB80 & CB80 Extra - Pyrethrins, Piperonyl Butoxide
- DEMAND CS - Lamda Chyalothrin
- DFORCE HPX - Deltamethrin
- DF 5000 DRAIN TREATMENT - Propylene Glycol
- ECO PCO ACU - 2-Phenethyl Propionate
- ECO RAIDER - Geraniol, Cedar Oil, Sodium Lauryl Sulfate
- GENTROL AEROSOL - (S)-Hydroprene
- IVADE BIOCLEANER - Nonpathogenic bacillus
- INVITE BIOFOAM - Ethyl Alcohol
- MAXFORCE FLY SPOT BAIT - Imidacloprid
- NYGUARD IGR - 2-[1-Methyl-2-(4-phenoxyphenoxy) ethoxy] pyridine
- ONSLAUGHT - (S)-cyano (3-phenoxyphenyl) methyl-(S)-4-chloro-alpha-(1-methylethyl) benzeneacetate
- SUSPEND SC - Deltamethrin

Traps

- 960 VECTOR FRUIT FLY TRAP
- INVITE FRUIT FLY TRAP
- QUICKSTRIKE FLY ABATEMENT STRIP
