CAUTION: PESTICIDES ARE TOXIC CHEMICALS. Structural Pest Control operations are licensed and regulated by the Structural Pest Control Board and apply to pesticides which are registered and approved for by use by the California Department of Food and Agriculture and the U.S. Environmental Protection Agency. Registration is granted when the state finds that, based on existing scientific evidence, there are no appreciable risks if proper use conditions are followed or that the risks are outweighed by the benefits. The degree of risk depends upon the degree of exposure, so exposure should be minimized.

ANTICOAGULANT REACTION: If Rodenticide ingestion occurs, you may experience symptoms of mild shock or bleeding.

PESTICIDE REACTION: If within 24 hours following application you experience symptoms similar to common seasonal illnesses comparable to the flu, contact your physician or poison control center and your pest control operator immediately.
